Find the right product quickly and easily

Please visit our website www.otto-chemie.com or use our practical OTTO app for up to date information on our products and many useful services and tips.

The OTTO app

Whether iOS or Android: With the OTTO app for smartphones and tablet PCs you always have the solution to all application issues at your side. Product search, consumption calculator, colour recommendation, order, contact – and if you wish to be informed in good time about the latest news, simply activate push notifications.

Download now via the App Store or Google Play.

Dear business customers and partners,

The year 2023 was characterised by countless challenges, new developments and far-reaching changes. In particular, the decline in building permits, rising interest rates and the omnipresent inflation have had a significant impact on our business environment.

Being a family business allows us to respond to changes at short notice and with relative flexibility. In this context, we have identified key topics for the new 2024 financial year, which with your help and support we want to tackle and drive forward strategically.

One of our most important concerns is the implementation of a comprehensive sustainability strategy, which does not only aim to make our entire production and logistics processes more sustainable, but also is intended to save as much waste, CO₂, raw materials and energy in the production of packaging for our products as possible, thanks to the gradual switch to packaging made from recycled plastic. Our ambitious goal: To switch all products for which it is technically possible to so-called recycle packaging by 2030.

In addition, we are constantly adapting our current product range to the requirements and trends of the market: By offering you the widest possible range of colours and consistently driving forward the development of innovative solutions. In the proven premium quality and at the best price/performance ratio.

It is a standard that we set ourselves anew every day. This applies both to our products and to our cooperation with our clients and partners. It is a partnership that represents more than just a business relationship for us and will never be taken for granted. The fact that we owe our success to our close partnerships based on trust, allows us to ensure long-term stability and growth in these challenging times. With this in mind – here's to a successful 2024.

With best regards,
Your management of OTTO-CHEMIE

We are building the future

THE OTTO SUSTAINABILITY STRATEGY

OUR VISION

„We are building the future“

OUR MISSION

„For OTTO, sustainability is a constant effort to combine environmental, economical and social aspects in the best possible way in order to improve the living conditions of today’s generations as well as those of tomorrow. As an active member of society, we are continuously working together with all of our partners on a sustainable value-added chain.“

Johann Hafner, Managing Director of Hermann Otto GmbH, 2022

Quality creates cohesion

today, tomorrow and beyond

AWARDS

Making a difference: silver medal for our sustainability effort

We underwent a comprehensive evaluation of our sustainability practices performed by EcoVadis and were awarded a silver medal, which distinguishes us as one of the top 13% of companies in our industry.

All about sustainability at OTTO

We are members of these organisations

Umwelt + Klimapakt Bayern

We are involved in the Umwelt + Klimapakt Bayern with qualified voluntary environmental services.

Integrity Next

You can find an overview of our sustainable supplier management on our Integrity Next profile.

Responsible Care

We do more than laws and regulations require and are a member of Responsible Care, an initiative of the Chemical Industry Association.

Together for Sustainability

We had our sustainability standards reviewed by an independent external third party based on the criteria of the "Together for Sustainability" initiative.

GREY IS THE NEW GREEN.

Our goal:
Conversion to
recyclate packaging
for all products
where it is technically
possible by 2030.

The OTTO recyclate cartridges
can be recognised by their new
grey colour and the recycling logo:

Today, tomorrow and beyond

Our joint contribution to plastic recycling

- ✓ **Turn old into new:**
Cartridges containing at least 40% of
recyclate material obtained from used plastic.
- ✓ **Thinking about the future today:**
1 tonne of recyclate saves approx. 1.45 tonnes of CO₂.
(Source: Magdeburg Stendal University of Applied Sciences)
- ✓ **Same content, same quality:**
Assurance of the proven OTTO quality through
extensive quality testing of the cartridges.

About OTTO sustainability strategy

Changes in product range
