These colour recommendations between pre-fabricated grouts and the corresponding OTTO sealants have been made without taking the colours of floor/wall coverings into account. In the end the optical appearance of the colour of the finished floor/wall will be decisive for the final choice of the sealant colour.

We have set up this colour table in front of you as suggestion without obligation. For your own colour comparisons please order our most recent colour charts with original colour dots! Please note that changing conditions on the building site and varying application techniques for the grouts can lead to colour deviations.

Please see the relevant technical data sheets for technical information and application suggestions for our sealants.

The table in front of you will be updated following market developments. With these colour comparisons all former tables loose their validity.
