

OTTO Cleaner F

The surface cleaner

Alcohol-based cleaner

REF

Characteristics

- ▶ Cleaning metallic materials (plain or powder-coated) of non-cured OTTOCOLL® PU adhesive residues
- ▶ Very good cleaning and degreasing effect
- ▶ Dries quickly leaving no residue
- ▶ Ventilation time not required
- ▶ Pleasant odour
- ▶ Compatible with conventional powder coatings

Fields of application

- ▶ Removing grease or oil films on metallic substrates

Technical properties

Density at + 23 °C [g/cm³] ~ 0,8

Shelf life at 23 °C/50 % RH 24 [months]

These data are not suitable for the issue of specifications. Please contact OTTO-CHEMIE before issuing specifications.

Important information

The cleaner has been developed for OTTO sealants / adhesives to ensure an optimal adhesion in combination with these.

Application information

Apply the cleaner with a lint-free cotton cloth and remove the uncured adhesive. Powder coated metallic profiles should always be cleaned in lengthwise direction (not rotating). Due to the large number of different powder coatings we cannot exclude that OTTO Cleaner F attacks very sensitive powder coatings. Residues of cured adhesives in the cotton cloths as well as frequent, strong and rotating cleaning facilitates the attack to powder coatings. For this reason we recommend to use always fresh cotton cloths for cleaning. Due to the many possible influences during and after application, the customer always has to carry out trials first. Please observe the recommended shelf life which is printed on the packaging.

Packaging

	100 ml aluminium bottle	1,000 ml aluminium bottle	5 l tin canister	10 l tin canister	25 l tin drum with tap hole*	200 l tin drum with tap holes*
○ colourless	REF-50	REF-55	REF-58	REF-60	on request	on request
Pieces per packaging unit	15	5	1	1	1	1
Pieces per pallet			82	50
